

CITY OF NEW ORLEANS

O.C. Haley Blvd. Streetscape Project St. Andrew St. to Calliope St.

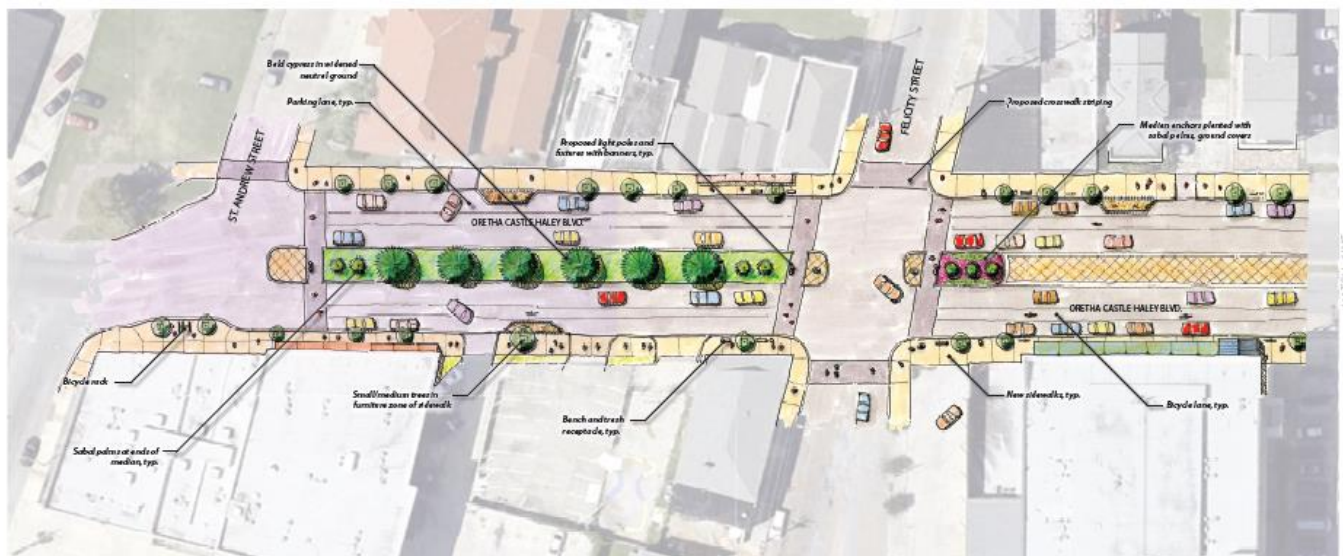

A streetscape is an improvement project that enhances a public area. This type of development is designed to trigger subsequent recovery and help create additional and continued private investment in the City's key recovery areas and surrounding neighborhoods. There are a total of 25 streetscape projects currently underway or planned in the City of New Orleans.

The proposed scope of work for the O.C. Haley Blvd. Streetscape Project includes:

- Widening the existing median between Felicite St. and Martin Luther King Blvd.; paving it in stamped concrete.
- Installing wider, landscaped medians between St. Andrew and Felicite streets, and Martin Luther King Blvd. and Calliope St.
- Installing new Americans with Disabilities Act-compliant curb ramps.
- Repairing damaged sidewalks and improving landscaping.
- Converting the roadway from two travel lanes and one parking lane into a parking lane, bicycle lane and travel lane in each direction.
- Striping new high visibility crosswalks and bike lane.
- Asphaltting roadway repairs.

The total cost for this project is approximately \$1.8M and is funded by Disaster - Community Development Block Grants. The project was designed by GEC, Inc. and will be constructed by Roubion Roads and Streets, LLC. Construction will begin in late August 2016 and last through spring of 2017.

During construction, residents and businesses can expect to experience temporary impacts such as limited access to areas within the construction zone, movement of heavy equipment and elevated noise levels. Residents and business owners are urged to pay attention to construction safety signage and remain outside of designated construction areas.

The City and its contractor will continue to minimize impacts and keep residents and businesses well informed of construction activities. Questions about this project may be directed to Cheryn Robles at the Department of Public Works by telephone at 504-658-8046 or send e-mail to crobles@nola.gov.
